Jim – Tables H3.1-7 and 8 also do not have the PCB Aroclor data in them. Could you please provide the values?

Thanks,

Kristine Koch

Thanks Kristine, I'll discuss this with Gene and let you know if we have issues that need to be discussed. Jim.

Jim – I'm currently working on the mobile sediment section (sediment traps) and was looking at the tables 5.2-1 through 5.2-4. I compared those to tables H3.1-7 and H3.1-8. I originally thought that the summary statistics were the way to go, but in looking at the information and presentation, I would rather keep the Appendix H tables and have Integral create similar tables for each quarter of the 2006/2007 sampling event. Again, these tables are to only include the ICs – could include TOC, too. Like tables would be needed for Appendix D for key contaminants not discussed.

Let me know if you need to discuss. The sooner I could get these, the better so that I can continue my edits.

Thanks,
